WORK EXPERIENCE

Hotel Booking Reservation System

Github | Preview

I designed and developed a Hotel Reservation Booking System using **PHP**, **Laravel**, **jQuery**, **MySQL**, and **Ajax**.

Key features:
- Laravel Authentication
- Booking Notification with Real Time
- Payment Gateway Integration (Stripe, COD)
- User Role Management And Permission
- Manage Reservation Inventory
- Booking Report System
- Custom Booking Mailing System
- Manage Room Inventory
- Import and Export From Excel File
- Advance Room Search Option
- Generate Booking Invoice in PDF
- Multiple Image Upload System
- Dynamic Email Configuration

Ecommerce Website

Github | Preview

As a fresher web developer, I have successfully completed a comprehensive e-commerce project By using, **PHP**, **Laravel**, **Vue** and **Mysql**

Key features:
- Advance Product Management System
- Advanced add-to-cart Feature
- Dashboard Analytics
- Multi-authentication Admin-Vendor-User
- Advanced Product Search
- Product Review & Rating
- Multiple Payment Gateways (sslcommerz, COD)
- Order Management Feature
- Advanced Order Tracking
